## PROGRAM DESCRIPTION

The **Tai Chi Fundamentals® Program** (TCF) provides a prequel and support to a lineage tai chi form, and creates a bridge between tai chi practice and the medical model. The first program of its kind, it provides a clear, systematic approach for mastering tai chi basics that builds from simple to complex patterns of movement. Integrates mind/body components of tai chi with clinical overview, movement analysis, therapeutic & functional applications.

**Program Elements:** movements are taught in a motor development progression and Includes:

-**Basic Moves** a series of exercises that trains postural alignment, body mechanics and energetic components of tai chi. Designed as building blocks for learning tai chi, they are taught in a simple-to-complex progression with discrete, measurable increments in difficulty and have applications as assessment and intervention tools.

-**Original TCF Form:** Flowing sequence of simple to more complex movements of a modified Yang Style Tai Chi form.

-**Mind/Body Skills Training:** integrated into both Basic Moves and Form instruction. Fosters attention and focus, a calm observant state of mind, awareness of posture and breathing and physical relaxation. Characteristic of all traditional tai chi practice, it fosters cultivation of healthy qi or vital energy.

**Development:** in 1996 by Tricia Yu, MA and Jill Johnson, MS, PT, targeting elements from traditional tai chi that enhance balance, coordination, strength and endurance.

**The TCF Program has been featured in:** *PT Journal, Journal of Rehab Management, The Gerontologist, APTA's GeriNotes, Medline Plus, Topics in Geriatric Rehabilitation, Journal of Asian Martial Arts, Wellness Program Management Advisor, ACSM's Health and Fitness Journal, and Massage and Bodywork.*
